Nuts & bolts w/mounting plate

Cargo Van Loading Plate

What is it?

- Our adjustable, aluminum plate is required for cargo vans with step bumpers. Adjusts to fit different makes and models of cargo vans.
- The plate attaches to your vehicle's cargo area floor and rests on the step bumper to create an uninterrupted 90-degree loading platform.
- Plywood flooring installation is recommended but can be used on composite floors.
- Used for loading / unloading only. Stores easily during transport.
- **Why do I need one?**
- For safe, fast and easy loading / unloading using InnoLIFT portable loaders moving palletized freight.
- Keeps your load properly balanced & supported to avoid potential injury.
